

Pagero and Centsoft new partnership is a two-way street

Pagero and Centsoft have announced the beginning of a new two-way partnership. The two tech companies are teaming up to offer their clientele a complete solution for automated financial operations.

The new partnership comes on the back of two recent acquisitions: the acquisition of Centsoft by Palette Software, and that of [Palette Network](#) by Pagero. After some time weighing the benefits of different types of partnerships, Pagero and Centsoft finalised an agreement this fall that will prove to be mutually beneficial for both companies, as well as their customers.

More options for a complete solution

Together, Pagero and Centsoft are opening doors to better order-to-cash and purchase-to-pay options for their customers. Centsoft offers a cloud-based workflow system to streamline accounts payable operations. Its quick and easy set up model makes it a simple solution for Pagero customers lacking a workflow system.

Pagero offers a 100% digital inbound e-invoice solution that will serve as option for Centsoft customers looking to fully automate their accounts payable operations. For clients in need of accounts receivable automation or a complete solution for electronic O2C and P2P processes, Centsoft can refer them to Pagero's service offering.

"To take advantage of the full benefits of the Pagero services for AP automation, and stay ahead of the digital transformation, a workflow system is key. With the combination of Pagero and Centsoft, the level of data quality has never been higher and workflow processes never smoother. We welcome Centsoft to the Pagero Partner Community and look forward to a mutually beneficial relationship," says Mattias Enerbäck, Partner Manager at Pagero.

Quote about the partnership from Centsoft

"Together with Pagero we can offer competitive solutions for our customers to digitize and automate their business processes. With a seamless integration between Pagero and Centsoft the capture, coding and workflow of the supplier invoices will be more efficient. We are confident that this partnership will be a success for both Centsoft and Pagero and we are looking forward to a bigger spread of our automation solutions worldwide," states Ingrid Apelgren, Head of International Markets at Centsoft.

About Pagero

One connection – global reach

We believe business should be easy. That's why we are building the world's largest, open business network. With our cloud-based network, you can reach any business, anywhere in the world – no matter how many borders your operations may cross. We take care of the technical and regulatory requirements across your entire order-to-cash, purchase-to-pay and freight processes, to give you data accuracy and security, transparency and real-time visibility. All this through a single connection.
